A Zonge International Company

News Release

January 3, 2012

NGA JOINS ZONGE

Zonge International, Inc. and Northwest Geophysical Associates, Inc. are pleased to announce the acquisition of NGA by Zonge. Zonge is proud to add NGA's 30 years of expertise in geophysical services to their organization. Zonge plans to retain NGA personnel, operations and the Portland office location and during the next quarter will add experienced administrative, geophysical service and support staff. This partnering of NGA with Zonge will broaden the geophysical field service capabilities within the U.S. and internationally for current and future clients. Dr. Rowland French, the past President of NGA, will remain as the Chief Geophysicist in the Portland office.

About NGA

Northwest Geophysical Associates, Inc., founded in 1981, has provided a wide range of geophysical services to clients, particularly in the Pacific Northwest and Alaska. Their work supports geotechnical, environmental, and groundwater projects by providing a wide range of geophysical techniques for subsurface investigation.

About Zonge

For 40 years, Zonge has been a leader in the development of geophysical instrumentation and field service applications for environmental, geotechnical and hydrologic problems, as well as mineral and resource exploration. Zonge's advanced geophysical technologies are used to provide subsurface imaging, information on rock properties, and detection of anomalous subsurface conditions. Zonge's clients include engineering, hydrology, environmental consulting, mining, petroleum and geothermal exploration companies; in addition to their extensive list of private clientele they routinely work for federal, state and local governmental agencies. Zonge currently has office locations in Arizona, Colorado, Nevada, Alaska, Minnesota and now Oregon.
